EDUCATION

X(2019 - 2020)

CBSE BOARD

- 75% of Marks

XII(2021-2022)

HP BOARD

- 75% of Marks

2022-2025

BACHELOR OF COMPUTER APPLICATIONS

- Affiliated to PTU

MASTER OF COMPUTER APPLICATIONS

- Pursuing from LPU

SKILLS

- MERN Stack Development
- RESTful API Development
- HTML, CSS, JavaScript
- Frontend Development
(React.js)
- Database Management
(MongoDB)

PROFILE

Motivated and detail-oriented Full Stack Developer with hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building responsive web applications and RESTful APIs. Proficient in leveraging AI tools efficiently to optimize development workflows and time management. Strong problem-solving mindset with a passion for continuous learning and innovation.

PROJECTS

1. EMPLOYEE MANAGEMENT SYSTEM | REACT, TAILWIND

- Built a responsive employee management app using React.js & Tailwind CSS.
- Implemented form validation using Formik & Yup with custom logic
- Developed CRUD operations with React Context API for state management
- Integrated React Router and ensured data integrity with duplicate checks
- Leveraged AI tools to improve development efficiency

2. EMPLOYEE MANAGEMENT SYSTEM (REDUX)

- Built employee management app using React, Redux Toolkit & Tailwind CSS.
- Managed global state with Redux (store, slice, actions)
- Implemented CRUD operations with validation and duplicate checks.
- Integrated React Router for navigation between form and data views.
- Optimized form handling and validation logic for better user experience.

3. MULTI-STEP FORM (STEPPER) | REACT, FORMIK, YUP, TAILWIND

- Developed a multi-step form with dynamic routing using React Router.
- Implemented form handling and validation using Formik & Yup.
- Built step-wise validation logic to control navigation between steps.
- Designed responsive UI using Tailwind CSS for improved user experience.
- Managed complex form state across multiple steps efficiently.

4. MUSIC STREAMING BACKEND API | NODE.JS, EXPRESS, MONGODB

- Developed RESTful APIs for user authentication using JWT and bcrypt.
- Implemented role-based access control (user, artist, admin)
- Built secure login/register system with cookie-based authentication.
- Integrated file upload using Multer and cloud storage (ImageKit)
- Designed MongoDB schemas for users, music, and albums using Mongoose.
- Tested APIs using Postman and managed database with MongoDB Compass
